Scaffolding and Formwork Solution

Keeping track of scaffolding and related costs in the construction industry, whether you are a scaffolding hire company or using your own scaffolding can be challenging. Internal and external scaffolding can be damaged, lost or stolen on site. It is therefore vital to keep track of items being used on site, items that have been moved from site and stock in store.

In addition, if labour is being supplied these costs need to be allocated to the appropriate site. Calculating costs or income manually can be tedious as, scaffolding is continuously being moved. This process has been completely automated by Whimbrel software. Whimbrel is a cloud based application and can be accessed by site and storage depot.

Whimbrel's scaffolding management system has the following features:

- Records opening and closing balances for each site
- Manages scaffolding movements from site to site and to storage
- A double entry system to eliminate errors
- Custom designed scaffolding stock reports and invoicing templates
- Scaffolding labour management module
- Keeps track of daily, weekly and monthly scaffolding hire income
- Controls new scaffolding purchases
- Manages scaffolding inspections
- Calculates cost per item and cost per ton
- Manages scaffolding inspections
- Measures labour costs for erection and dismantling
- Customised scaffolding templates
- All reports can be exported to Microsoft Excel with all the formatting automated
- Additional modules can be developed if required

Reports

- Scaffolding Quantity and Value Report – Controls internal and external scaffolding quantities and values, exports all reports to Microsoft Excel

The screenshot displays a Microsoft Excel spreadsheet titled 'Quantity and Value Report- Scaffold'. The spreadsheet is organized into columns for different sites and rows for various scaffolding components. The data is summarized in the table below.

BY CONTRACT	Plant Yard		Site 5		Site 2		Site 3		Site 4		Site 5		Site 5		Site 6	
	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value

- Scaffolding balances – Monitors all deliveries and returns, both internal and external. Requisition is created on site the stores depot checks availability and creates the delivery notes. The site confirms the delivery of the scaffolding. The scaffolding returns are confirmed by the stores depot.

Summary

Growing your business requires the right software solutions to ensure good communication between the different software applications. Having a single integrated management information system across your enterprise is a necessity.

Business Analysis

The business analysis must be correct to ensure successful software projects. Whimbrel specialises in identifying business problems while taking into account long term goals.

Whimbrel takes responsibility for identifying changing needs, developing and configuring the software to suit these needs, whilst supporting the business through-out the implementation process.

Change Management

Whimbrel recognises that successful implementation of software solutions can only be achieved through good change management, an emphasis is also placed on improving financial management and control. This ensures that improvements in both productivity and collaboration are achieved.

From the beginning of the project we strive to ensure that all stakeholders are fully engaged. Change is not comfortable for many people; a company's workforce will need both help and an improvement in skills to handle change. The challenge is getting people on board by managing resistance effectively, thereby ensuring the required changes are implemented efficiently.

Leadership and Skills Development

Whimbrel's software services include training and mentoring of key personnel to prepare them for leadership roles within the new software environment.

We will act as a skills development facilitator within the organisation. This includes assisting personnel to develop their core financial and management skills.
