Construction Subcontractor Cost Management Solution

Subcontractor certificates need to be reconciled monthly to the actual payments on the accounting package. This ensures that errors are picked up before contract completion. It is vital that construction companies have a solution that enables them to manage the monthly cash flow liabilities of subcontractor retentions. Contra charging subcontractors, for site costs paid for on their behalf by the main contractor, is also an important aspect of subcontractor management.

Whimbrel's custom designed subcontractor software typically covers the following:

- Generates subcontractor certificates
- Records this month's the previous months' and cumulative certificate values
- Calculates retention and quality retention figures
- Manages monthly contra charge costs
- Enables a choice of financial and subcontractor reports
- Keeps track of all subcontractor payments on one system
- Records total subcontractor costs per job
- Records subcontractor costs across all contracts
- Manages subcontractor site instructions
- Automatic Email Alerts
- Customised templates
- Keeps a historical record of all transactions
- Requests customised modules if required

Reports

- Controls subcontractor's claims, retentions and contra charge costs.

- Checks monthly subcontractor retention costs and exports all reports to Microsoft Excel.

The screenshot displays a web application interface for subcontractor retention reporting. On the left, a 'SUBCONTRACTOR CERTIFICATE DETAILS' form shows information for contract 2306, including original value, retention released, and contra charges. Below this are sections for 'THIS MONTH CUMULATIVE CERTIFICATE VALUES', 'PREVIOUS MONTHS CUMULATIVE CERTIFICATE VALUES', and 'CURRENT MONTHS CERTIFICATE VALUES'. A 'SUBCONTRACTORS NOTES' section is also present.

The main area shows a 'Read-only Report' table with columns: Cert Number, Certificate Date, Month, Year, Monthly Total To Date, Percent of Total to Date, Percent of Contract Value, Monthly Net Retention, Subcontractor, and Contract. The table lists various subcontractors (Five, Four, One, Six, Three) and their retention amounts over time, with 'Split Total' rows indicating aggregated data.

An Excel window is overlaid on the report, titled 'Subcontractor Retentions - By Contract'. It contains the same data as the report table, with a 'Date Report Generated: (28/11/2017)' header. The Excel window shows the data for subcontractors One, Six, and Three, with their respective retention values and percentages.

At the bottom of the web application, there is a status bar indicating 'Local | Subcontractor Two | Site One' and a warning: 'Warning not live database!'.

- Creates subcontractor certificate as a PDF or Microsoft Excel document

Summary

Growing your business requires the right software solutions to ensure good communication between the different software applications. Having a single integrated management information system across your enterprise is a necessity.

Business Analysis

The business analysis must be correct to ensure successful software projects. Whimbrel specialises in identifying business problems while taking into account long term goals.

Whimbrel takes responsibility for identifying changing needs, developing and configuring the software to suit these needs, whilst supporting the business through-out the implementation process.

Change Management

Whimbrel recognises that successful implementation of software solutions can only be achieved through good change management, an emphasis is also placed on improving financial management and control. This ensures that improvements in both productivity and collaboration are achieved.

From the beginning of the project we strive to ensure that all stakeholders are fully engaged. Change is not comfortable for many people; a company's workforce will need both help and an improvement in skills to handle change. The challenge is getting people on board by managing resistance effectively, thereby ensuring the required changes are implemented efficiently.

Leadership and Skills Development

Whimbrel's software services include training and mentoring of key personnel to prepare them for leadership roles within the new software environment.

We will act as a skills development facilitator within the organisation. This includes assisting personnel to develop their core financial and management skills.
